TRANSCRIPT OF 33RD ANNUAL GENERAL MEETING HELD ON SEPTEMBER 02, 2026 AT 11:30 AM

Good Morning, Ladies and Gentlemen. It is 11:30 am and I would like to welcome you to the 33rd Annual General Meeting of your Company. On behalf of the Board of Directors, I want to thank you for taking the time out to join us today. Your continued support and confidence in us, drives us to do more and create greater value. This meeting is being conducted through VC/ OAVM (Video Conferencing/ Other Audio Visual Means) as per guidelines issued by the Ministry of Corporate Affairs (MCA) and Securities and Exchange Board of India (SEBI).

In line with the MCA General Circular dated May 5, 2020 read with General Circulars dated April 8, 2020 and April 13, 2020, subsequent circulars issued in this regard, the latest being September 22, 2025 and and Regulation 36 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 and relevant provisions of the Companies Act, 2013, the Notice of the AGM along with the 33rd Annual Report for the financial year 2025-26 was sent through electronic mode to those Members whose e-mail addresses are registered with the Company/Depositories. Further, in accordance with Regulation 36(1)(b) of the SEBI Listing Regulations, the Company has also sent a letter to the members whose e-mail addresses are not registered with the Company/its Registrar and Transfer Agent/Depositories, providing a web-link from where the Integrated Annual Report can be accessed on the website of the Company.

The Notice convening the 33rd AGM was also uploaded on the website of the Company and is accessible on the websites of the Stock Exchanges and on the website of NSDL.

I wish to inform the members that in case of any technology related challenges and I am unable to continue to participate in this Meeting, any one of the Directors who is able to continue would preside over the meeting.

I would like to introduce all the members of the Board:

Shri Raunak Agarwal, Deputy Managing Director	Present Next to me

Shri Rohan Agarwal, Deputy Managing Director	Present Next to me
Shri P K Mundra, Executive Director & CFO	Present Via Video Conference
Smt. Reena Agarwal, Whole Time Director	Has not been able to attend the meeting due to some prior commitment.
Shri R K Bakshi, Independent Director & Chairman of Audit, Stakeholders' Relationship, Nomination & Remuneration, CSR Committee & Risk Management Committee	Present Via Video Conference
Shri K L Chandakji, Independent Director	Present Via Video Conference
Shri Sanjay Sinha, Independent Director	Present Via Video Conference
Smt. Sunita Nair, Independent Director	Present Next to me
Shri Mahendra Kumar Gupta, Independent Director	Present Via Video Conference

Participation of members through video conference is being reckoned for the purpose of quorum as per the circulars issued by Ministry of Company Affairs and the Companies Act, 2013. The requisite quorum is present through video conference to conduct the proceedings of this meeting. The quorum being present, I call this meeting to order. I now request Company Secretary, to provide general instructions to the members regarding participation in this meeting.

COMPANY SECRETARY

Thank you, Chairman.

Good Morning, everyone. As informed by the Chairman, this Annual General Meeting is being held through video conference in accordance with the provisions of Companies Act, 2013 and SEBI and the circulars issued by the Ministry of Corporate Affairs. Facility for joining this meeting through video conference is made available for the members on a first-come-first-serve basis. The Register of Directors and Key Managerial

Personnel, the Register of Contracts or Arrangements, Register of Loans, Investments, Guarantees and Securities, Register of Members and other statutory documents are available for inspection by the members during the meeting and a request may be sent to investors@nrail.com. As the AGM is held through video conference, the facility for appointment of proxies by the members was not applicable and hence the proxy register is not available for inspection.

The Company has received requests from a few members to register them as speakers at the meeting. Accordingly, the floor will be open for these members to ask questions or express their views. The moderator will facilitate this session once the Chairperson opens the floor for question and answers. It may be noted that the Company reserves the right to limit the number of members asking questions depending on the availability of time at the AGM.

The Company had provided the facility to cast the votes electronically, on all resolutions set forth in the Notice. Members who have not cast their votes and who are participating in this meeting will have an opportunity to cast their votes during the meeting through the e-voting system provided by NSDL. Members can click on the "Vote" tab on their screen to avail this feature. Members are requested to refer to instructions provided in the notice or appearing on the video conference page, for a seamless participation. In case members face any difficulty, they may reach out on the helpline numbers.

Thank you.

Back to you Chairman.

CHAIRMAN

As the Annual Report is already circulated to all the members, I hope the 33rd Annual Report containing Audited Financial Statements for the year ended March 31, 2026 together with the Auditors' Report and the Directors' Report have been perused by you. Now, with your kind permission the Notice convening the 33rd Annual General Meeting shall be taken as read.

The Statutory Auditors, GMJ & Co. and Secretarial Auditors, Parikh & Associates, have expressed unqualified opinion in their respective audit reports for the financial year 2025-26. Since there are no qualifications in reports issued by the Statutory Auditors and Secretarial Auditor, therefore same is not required to be read.

The representatives of the Statutory Auditors and Secretarial Auditors are also present in this AGM.

CHAIRMAN'S SPEECH

Dear Shareholders,

Overview

The financial year under review marked a defining milestone in the journey of NR Agarwal Industries Limited.

Despite subdued industry realizations, elevated competitive intensity and volatility in global paper markets, your Company delivered a record operational and financial performance.

More importantly, the year validated the long-term strategic choice made during an uncertain period - investing ahead of the curve, expanding manufacturing capacity with conviction and strengthening organisational capabilities for a stronger future.

Your Company reported a 29.32% growth in revenues from Rs 1659.03 crore in FY 2024-25 to Rs 2145.45 crore in FY 2025-26. EBITDA increased by 35% from Rs 142.44 crore to Rs 192.42 crore, while net profit rose by 147.59% from Rs 17.65 crore to Rs 43.70 crore. This performance was achieved during a period when industry-wide realizations remained under pressure owing to a global paperboard oversupply and intermittent dumping into India.

The quality of earnings improved significantly as well. Return on Capital Employed strengthened from 5.55% to 8.40% and EBITDA margin improved from 8.59% to 8.97%. The Company demonstrated its ability to execute competently across every operational dimension - project commissioning, production stabilization, market development, export penetration, value-added product growth, working capital discipline and environmental responsibility.

A year of operational validation

The growth achieved during the year was anchored in two realities: the continued strength of the Company's established business and the successful stabilization of its 2,40,000 TPA paperboard plant commissioned in March 2024. At the time of commissioning, industry observers had expressed reservations regarding the timing and scale of the expansion amid sluggish realizations, increased imports and aggressive overseas pricing. However, our management remained guided by a long-term strategic perspective.

The Company believed the expansion project possessed structural advantages - strategic location in Western India, proximity to key consumption centres cum ports, an established domestic and export network, a growing value-added portfolio and an efficient capital cost per ton. The year under review validated this conviction comprehensively.

In an industry where large paper machines often face prolonged stabilization periods, your Company implemented the largest paperboard expansion undertaken in India at a single location with speed and efficiency.

This achievement validated the Company's competence in engineering selection, project execution, process optimization and manufacturing stabilization. The economics of the expansion remain compelling. The 900 TPD plant is expected to achieve payback within approximately five years despite possessing an operational life estimated at more than three decades.

Positioned in a structurally growing sector

India's paperboard sector today stands at the intersection of multiple structural growth drivers shaping the country's economic transformation. Paperboard is no longer linked only to conventional packaging demand; it has become indispensable for organized retail, food delivery, pharmaceuticals, FMCG distribution, e-commerce logistics and branded manufacturing.

India's paperboard market, estimated at nearly 6 million tons annually, continues to grow at approximately 7% each year. Per capita paperboard consumption in India remains significantly lower than developed markets, indicating substantial headroom for long-term expansion. Sustainability trends are expected to act as an additional catalyst as governments, corporations and consumers increasingly shift from plastic-based packaging towards recyclable paperboard solutions.

Against this backdrop, your Company's decision to invest aggressively in scale and efficiency appears increasingly strategic and timely.

Embarking on the next expansion phase

Following the successful stabilisation of the 2,40,000 TPA expansion programme, your Company initiated its most ambitious project - a proposed 500,000 TPA paperboard expansion programme. The Company has consistently demonstrated the ability to invest counter-cyclically in

pursuit of long-term value creation, strengthening its manufacturing and marketing capabilities even during uncertain industry conditions.

The proposed expansion is more than 60% larger than the Company's previous capacity addition and is expected to transform NR Agarwal Industries into one of the largest paperboard producers globally within its category.

During the year under review, the Company undertook two strategically significant initiatives. **First,** it acquired 145 acres of land at Dahej, Gujarat for the proposed expansion. The location offers assured water availability, discharge infrastructure, logistical connectivity and regulatory alignment within the PCPIR zone, supporting efficient implementation and long-term competitiveness.

Second, the Company acquired a relatively young pre-used paperboard manufacturing machine from Europe. Based on advanced European technology and only a decade old, the machine is expected to be more efficient than several legacy pre-used machines operating in India.

The aggregate investment of approximately Rs 250 crore towards land and machinery was funded and expensed through the Company's books during the financial year itself, reflecting the Company's liquidity and financial discipline. The total project cost is estimated at approximately Rs 1500 crore encompassing land, construction, machinery and associated infrastructure. Construction is expected to commence in Q2 FY 2027-28, with commercial production anticipated by December 2029. Upon stabilization, the Company expects to possess consolidated manufacturing capacity of nearly one million tons annually by 2030, placing it within a select league of global paperboard companies operating at comparable scale.

Financial discipline and outlook

One of the defining characteristics of your Company's journey has been its commitment to financial prudence.

Over the next three years, the Company expects to substantially repay all existing long-term debt, strengthen its credit profile further and subsequently mobilize fresh long-tenure debt to finance the proposed Rs 1,500 crore expansion project. Importantly, the Company intends to pursue this expansion without equity dilution through a prudent mix of internal accruals and structured debt.

At the time of commissioning of the proposed facility in late 2030, the Company expects to possess nearly one million tons per annum of capacity with long-term debt of only around Rs 1,000 crore - potentially among the most efficient balance sheet structures within India's paperboard sector.

Looking ahead, the Company remains optimistic about the medium- and long-term prospects of the Indian paperboard sector as well as its own positioning within it. Supported by cost leadership, operational efficiencies and a growing value-added portfolio, the Company expects to remain attractively viable even if industry realizations remain moderate. The Company's EBITDA margin during FY 2025-26 stood at 8.97% reflecting this resilience.

At N R Agarwal Industries, we believe the coming decade will belong to companies that combine manufacturing scale with operational agility, sustainability and financial discipline. The foundations for this next phase have already been laid.

On behalf of the management team, I express my gratitude to our shareholders, customers, lenders, suppliers, employees and all stakeholders for their continued trust and support as we work towards building one of India's most respected paperboard enterprises.

Thank you for your patient hearing.

There are 9 items to agenda of this Annual General Meeting which are as under:

Items Nos. 1, 2 & 3 are Ordinary Business Items relating to statutory compliances. Item No. 4 relates to re-appointment and payment of remuneration to Shri P K Mundra as Whole time Director, designated as Executive Director & CFO. Item No. 5 & 6 relates to Increase in Borrowing powers upto Rs 5,000 Crore and subsequent mortgage/charge on the same . Item No. 7 & 8 relates to ratification of the remuneration payable to the Cost Auditors of the Company for FY 2025-26 & FY 2026-27. Item No. 9 relates to Alteration of object clause of Memorandum of Association of Company

We shall now take up each of the Agenda Items.

AGENDA ITEM NO. 1 - ORDINARY RESOLUTION

To receive, consider and adopt the audited financial statements of the Company for the financial year ended March 31, 2026, together with the reports of the Board of Directors and Auditors thereon

AGENDA ITEM NO. 2 – ORDINARY RESOLUTION

To declare a dividend of Rs 2/- (Rupees two only) per share on equity shares of the Company for the financial year ended March 31, 2026.

AGENDA ITEM NO. 3 – ORDINARY RESOLUTION

To appoint a Director in place of Shri P K Mundra (DIN: 10258728), who retires by rotation and being eligible, offers himself for re-appointment.

AGENDA ITEM NO. 4 – SPECIAL RESOLUTION

Approval for the re-appointment and payment of remuneration to Shri P K Mundra (DIN: 10258728) as Whole time Director, designated as Executive Director & CFO

AGENDA ITEM NO. 5 – SPECIAL RESOLUTION

Approval for increasing the borrowing powers under Section 180(1)(c) of the Companies Act, 2013 up to Rs 5,000 Crores

AGENDA ITEM NO. 6 – SPECIAL RESOLUTION

Creation of Mortgage/Charge on the Company's Undertakings and Assets to Secure Financial Assistance under Section 180(1)(a) of the Companies Act 2013 up to Rs 5,000 Crore

AGENDA ITEM NO. 7 – ORDINARY RESOLUTION

Ratification of Cost Auditor's remuneration for the Financial Year 2025-2026

AGENDA ITEM NO. 8 – ORDINARY RESOLUTION

Ratification of Cost Auditor's remuneration for the Financial Year 2026-2027

AGENDA ITEM NO. 9 –SPECIAL RESOLUTION

Alteration of Object Clause of the Memorandum of Association of the Company

We will now open the floor for any questions by members. We would request each member to turn on their video - only once when you are projected on the broadcast screen. Kindly unmute yourself and proceed to ask your question. Would request each member to be brief and avoid repeat questions. As has been the practice and to avoid repetition, the answers to all the questions will be provided after all the members have spoken. Once you have asked your question, you can mute yourself and continue to hear and watch the proceedings.

Some shareholders have sent their questions in advance, the management has already taken note of the same and they shall be answered with all other questions.

Speaker's List called out:

1. Devendra Bankatlal Rathi
2. Ayush Mittal
3. Kiran Devi Saraf
4. Ashish Tulsian
5. Jehangir Batiwala
6. Bimal Kumar Agarwal
7. Anil Parekh
8. Kishor Ratilal Kachalia
9. Keshav Garg
10. Bhanumati Ratilal Kachalia
11. Bharat Raj. K
12. Lekha Shah

I thank all the shareholders for their questions and suggestions. I will now answer the questions.

Mr. Ayush Mittal

Question:
Given the stabilization of the 900 TPD duplex capacity and other product segments, what production volume can be expected for FY 2026-27? Given the current prices, what could be the revenue potential? What is the current realization trend and how is the demand-supply scenario evolving?

Further, considering that the next Capex is a lengthy process, is there scope for debottlenecking the existing plant to support volume growth until the new capacity becomes operational?

What would be the sustainable EBITDA margin range for the business considering the current scale, product mix and raw material sourcing? What is the outlook on pulp prices?

Also, given that ROE and ROCE are currently below 10%, how does the management view value creation, particularly with another large CapEx planned?

Management Response:
The company is currently operating at almost 100% capacity utilization across most of its plants. Some additional production can be achieved through debottlenecking. The company expects production to reach approximately 5 lakh tonnes per annum in FY 2026-27.

In Q1 FY 2026-27, the company achieved revenue of approximately ₹650 crore. Accordingly, the company expects FY 2026-27 revenue to be in the range of approximately ₹2,700–₹2,900 crore.

The company does not wish to disclose exact product realizations due to price sensitivity. However, FBB is a value-added product and commands higher realization compared with grey-back board.

The company achieved EBITDA margins of 10%+ despite adverse market conditions in the previous year and expects margins to improve during the current year. However, given the volatility in international and financial markets, the company does not wish to provide a specific margin projection.

Regarding ROE and ROCE, management believes that the company is creating reasonable value, although returns have been affected by adverse market conditions. The company is working towards improving performance.

Mr. Keshav Garg

Question:
What was the production volume and capacity utilization in Q1 FY 2026-27? What is the outlook for FY 2026-27 in terms of revenue and profitability?

What are the current demand-supply dynamics, and have competitors announced any significant new capacities?

What is the maximum sustainable production and revenue potential of the existing capacity? What was the average realization and wastepaper cost? What sustainable EBITDA margin can be expected?

What percentage of production comes from higher-value products such as FBB, and what margin premium do these products command over conventional duplex board?

What is the expected peak debt? How much of the ₹1,500 crore Unit 6 CapEx will be funded through debt and internal accruals? What will be the expected commissioning timeline?

Response:
The company achieved production of 1,29,929 tonnes in Q1 FY 2026-27, supporting management's expectation of achieving approximately 5 lakh tonnes of annual production during FY 2026-27.

The 900 TPD duplex board machine is operating at approximately 100% capacity utilization, subject to product mix, GSM and quality requirements.

Management stated that there has been no major announcement of new board manufacturing capacity by competitors since the company's PM2 commenced production in March 2024. The company therefore believes that its planned expansion will be well positioned to capture market growth.

The company is currently able to sell substantially all of its production, with finished goods inventory remaining at relatively low levels.

Approximately 25% of PM2's production, equivalent to around 60,000 tonnes based on 2.4 lakh tonnes of capacity, is currently from the higher-value FBB segment. The company intends to increase the share of FBB further.

The company does not disclose exact realizations and raw material costs because of their sensitivity and volatility. Approximately 50% of wastepaper is sourced domestically and 50% is imported. Imported raw material prices are also affected by foreign exchange movements.

Management stated that FBB margins are currently broadly similar to grey-back margins, despite FBB being a value-added product. However, the company expects margins to improve as the product mix shifts further towards FBB.

The company's debt as of March 31, 2026 was approximately ₹536 crore. Management expects this debt to be reduced over the next two years. Even after the new project becomes operational, the company expects long-term debt to be approximately ₹1,000 crore.

For the proposed 1,500 TPD Unit 6 project, the total estimated CapEx is approximately ₹1,500 crore, of which:

- ₹1,000 crore is expected to be funded through debt; and
- ₹500 crore through internal accruals.

The company has already invested approximately ₹250 crore towards land and machinery acquisition. The remaining investment is expected to commence from Q2 of the following year and continue until commissioning.

Construction is expected to commence after obtaining the required environmental clearance, with commercial production targeted around December 2029.

The project will primarily manufacture value-added FBB, while also having the flexibility to manufacture grey-back board. Management expects the project to generate better economics than the existing project due to its larger scale.

Ms. Kiran Devi Saraf

Question:
Please provide a breakup of production capacities across different units, the types of paper manufactured and utilization levels. What is the short-term plan for increasing capacity before the proposed expansion?

What factors contributed to the improvement in Q1 FY 2026-27 revenue and profitability? What sustainable revenue and profit levels can be expected over FY 2026-27 and FY 2027-28?

What proportion of raw material consists of recycled wastepaper versus fresh pulp?

Management Response:
The company currently operates three major production units:

Unit	Product	Approx. Annual Capacity
Unit 1	Board	1.20 lakh tonnes
PM1	Writing & Printing Paper	1.08 lakh tonnes
PM2	Duplex Board	2.40 lakh tonnes

The combined production capacity is approximately 4.68 lakh tonnes per annum.

In the short term, growth will primarily come through debottlenecking and increasing the proportion of FBB production.

The improvement in Q1 performance reflects some stabilization in market conditions. Management is optimistic about the current year, supported by relatively stable currency and crude oil prices.

Over the next two years, growth is expected to be relatively moderate because the existing plants are already operating at high utilization. Incremental growth will primarily come from debottlenecking and increasing FBB production from approximately 25% to around 35% of PM2 production.

Ms. Lekha Shah

Question:
What are the company's plans to increase capacity utilization? How does management intend to compete with larger domestic and international paper manufacturers?

Management Response:
The company has already achieved high capacity utilization across its existing plants. Further improvement will come through debottlenecking and increasing the share of value-added products such as FBB.

The company's competitive strengths include its economies of scale, the size of its existing and planned machines, product quality, market positioning and management capabilities.

Additional Management Commentary on PM2 and FBB

Management stated that PM2, which commenced operations in March 2024, has now been fully stabilized.

The machine was originally designed primarily for grey-back production. However, the company successfully developed and manufactured FBB, which is a higher-value product.

PM2 has achieved production of approximately 2.4 lakh tonnes, with the company operating at effectively full capacity. Management indicated that the company has already achieved its FBB target of approximately 1.2 lakh tonnes and intends to increase the FBB share further during the current year.

Some additional production may be achieved through debottlenecking before the new project comes on stream.

Unit 6 – Proposed 1,500 TPD Expansion

The proposed Unit 6 project will have a capacity of approximately 1,500 TPD and an estimated project cost of ₹1,500 crore.

The project will primarily focus on value-added folding boxboard (FBB), while retaining the ability to manufacture grey-back board.

Management expects construction to begin around Q2 of the following year, subject to receipt of environmental clearance, with production targeted by December 2029.

The project is expected to be funded approximately as follows:

- Debt: ₹1,000 crore
- Internal accruals: ₹500 crore

Management expects the project to benefit from economies of scale and generate significantly better economics than the previous project. Specific projections for EBITDA margins, ROCE, IRR and payback period were not disclosed at this stage.

Management believes the additional capacity will be absorbed by market growth. The packaging segment is estimated to grow at approximately 7% annually, creating significant incremental demand over the coming years.

The company also highlighted that imports of grey-back board are currently limited, while FBB continues to face imports from China and other Asian countries. Management believes the existing Minimum Import Price (MIP) protection provides support to domestic manufacturers.

Raw Material and Cost Outlook

Approximately 50% of wastepaper is sourced domestically and 50% is imported. The company also imports certain pulp varieties required for FBB production.

Raw material prices remain volatile and are influenced by factors such as global prices and the US dollar exchange rate. The company manages this volatility through corresponding adjustments in selling prices and procurement strategies.

Management also stated that inventory levels may increase temporarily when pulp or other raw materials are purchased at attractive prices.

Overall Growth Outlook

Management emphasized that the paper industry is highly capital intensive and has a long gestation period. A new project typically requires approximately 2.5–3 years for construction and stabilization.

Accordingly, the next two years are expected to witness relatively moderate growth, driven mainly by:

1. Debottlenecking of existing capacity;
2. Higher production efficiency;
3. Increasing the share of FBB and other value-added products; and
4. Better product mix.

A more significant increase in production and revenue is expected once the new 1,500 TPD project becomes operational, targeted around FY 2029-30/FY 2030-31.

Management concluded that the company intends to expand capacity when market opportunities are favorable and remains optimistic about the company's long-term growth prospects.

Members may note that the voting on the NSDL platform will continue to be available 15 minutes post the close of AGM Therefore, members who have not cast their vote yet are requested to do so.

The Board of Directors has appointed Ms. Jigyasa Ved of M/s. Parikh & Associates, Practicing Company Secretary, as the scrutinizer to supervise the e-voting process. Further, I hereby authorize the Company Secretary, to declare the result of the voting and place the results on the website of the Company at the earliest. The resolutions, as set forth in the Notice, shall be deemed to be passed today subject to receipt of requisite number of votes.

As the business of the meeting is over, I declare the meeting as concluded and once again thanks all the participants for attending the AGM.
