Construction

Note:

1. Test Conditions -Temperature 23±1°C & Relative Humidity 50±2%. (Tappi 402)
2. All properties are according to NRAIL Unit 5, Sarigam measurements.
3. Tolerance are based upon 95% confidence limits of single mill measurement of conditioned random samples.
4. FSC Mix,FBB board is supplied on demand.
5. Regulatory: REACH,FDA, Heavy metal, ROHS

NR Power Coat is a premium coated folding box board featuring a lightly coated reverse side, engineered to provide superior printability on both sides along with excellent strength and stiffness. Designed for high-performance in modern converting operations, NR Power Coat ensures outstanding runnability, dimensional stability, and precise folding and creasing across a wide range of applications.

The smooth, coated front surface delivers exceptional results in high-quality offset printing, while the reverse coating enables secondary branding, regulatory information, or design elements to be printed internally. These features make NR Power Coat especially well-suited for pharmaceuticals, cosmetics & personal care, premium food packaging, luxury consumer goods, and applications requiring enhanced presentation and functionality inside and out.

Being a progressive organization,NR Agarwal Industries Ltd. continually evolves in response to customer requirements.The specification mentioned are therefore subject to change.
